ELEMENT SAUNA CABIN

**HARVIA**

Sauna & Spa

## Natural wellness to your everyday life

The Harvia Fenix sauna cabin is an ode to the ancient sauna culture. The designer was inspired by the atmosphere of a traditional Finnish smoke sauna and added a fresh, modern twist to the design.

Just relax and kick back to enjoy the healing heat of sauna!

### **Mix and match dark spruce and light aspen**

The benches are made of light aspen wood which creates a beautiful contrast with black panels. Aspen is also an ideal material for sauna use as the benches do not overheat.

**Note:** The water-based black stain on panels has been widely used and tested in saunas in the Nordics and has low VOC emissions.

### **Open and spacious feeling with potential to create different ambiances**

High-quality large glass wall on the front lets in natural light. But you can also create your own ambience with the optional remote controlled color LED lights (RGWB).

### **Durability with Nordic spruce**

Harvia Fenix is made of slow grown dense Nordic spruce which is known for its moisture resistance and therefore also for its durability in sauna use.

### **Complete insulation for energy-efficiency**

The high-quality 50mm thick insulation (0.037 W/m.K) makes the sauna energy-efficient and fast to heat up.

### **Safety both inside and out**

Designed with 70 years of experience taking into consideration all aspects of safety in sauna. For example, all window elements are made of 8mm safety glass and sauna benches in the Fenix are built with an extremely sturdy tongue and groove technique.

### **Economical delivery with a 1-day assembly**

Harvia Fenix is available in 2 easy to assemble sizes that are delivered economically in a flat pack.

# FENIX 1620

## Features

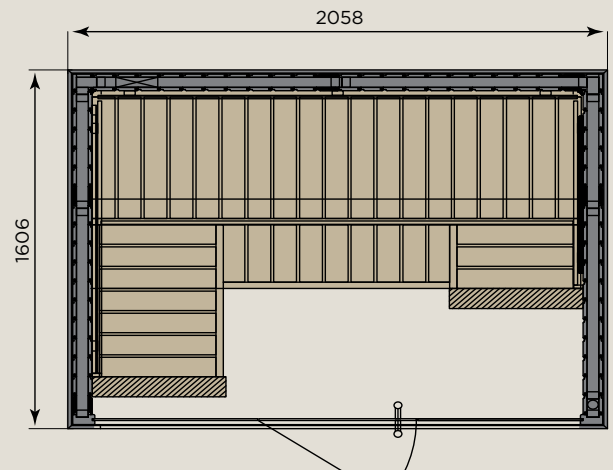

- Element cabin made of black treated spruce
- Roof element with roof rim
- Interior made of aspen wood
  - 1 x 600 mm bench and 3 x 500mm benches
  - Ventilation slit
  - Backrests
  - Intermediate bench panel
- Optional RGBW led lights
- Can be installed right or left handed

## Product details:

- Door made of single pane safety glass (600 x 1897 x 8 mm) left or right hinged
- 2 x single pane safety glass elements, clear (629 x 1939 x 8 mm)
- 15 mm sturdy black treated tongue and groove boards
- Assembly material and instructions
- Recommended heating output: 7.5–11 kW
- Cabin height: 2016 mm
- Net Weight 306 kg
